

Health EOC Net Control: Script & Schedule

Updated October 2018

This is [your call sign] calling the Health Emergency Operation Centre Net. Net Control is [your call sign], my name is [your name] and I am located at [your site] in [your location, BC].

Is there any station on this Health Emergency Operation Centre Net that is having difficulty hearing the Net Control station? [Pause for 3-5 seconds].

Is there another station on frequency that would offer to take over as Net Control if for any reason I am not able to continue? [Pause for 3-5 seconds to allow the designated back-up net control (BNC) station listed below to reply].

Is there any station requiring this frequency for emergency use or to pass emergency traffic? If so, call now. [Pause for 3-5 seconds].

Emergency traffic will always be recognized and handled immediately. During such an event, all stations are requested to standby and permit the Net Control station to handle the traffic.

This is a directed net which meets the first Wednesday of each month at 09:15 utilizing the [VE7RSI](#) repeater on Salt Spring Island on a frequency of 147.320 MHz, + offset, and a tone of 88.5 Hz for FM. The purpose of this Net is to maintain the capability for emergency communication between health care facilities, in the event of a disaster in and around the Lower Mainland and south Vancouver Island. [*]

Are there any announcements or early check-in? [Pause for 3-5 seconds and acknowledge any check-ins]

* Replace [text] in script with your details.

Site Key:

Zone	Site
PHC-SPH	St Paul's Hospital
